

Intercom

The team

- * **Eoghan McCabe** (CEO, product, visual design), **Des Traynor** (COO, customer development, user experience design), **Ciaran Lee** (CTO, software engineering), **David Barrett** (front-end engineering).
- * Prolific speakers / bloggers about software design / development and SaaS business.
- * Ran **Contrast** for four years, a popular web software design consultancy.
- * Launched **Qwitter** and **Exceptional** (both acquired).

The problem

- * **Building meaningful relationships with customers is hard / impossible for SaaS providers** (meaningful relationships → loyal customers → profitable customers and organic growth)
- * Building meaningful relationships requires: 1. customer discovery, 2. customer research, 3. customer communication, 4. relationship management
- * The current tools available are complex, ineffective, not built for SaaS... **there's no one tool to do customer relationship management and messaging for SaaS providers.**
- * (Even e-mail fails: generating targeted e-mail lists takes a lot of work, e-mail campaigns have terrible engagement because e-mail is out of context)

The solution

- * Intercom is...
 - simple install like Google Analytics,
 - customer base browsing (e.g. signed-up today, on premium plan),
 - individual customer research (e.g. see Twitter followers, company),
 - advanced in-app messaging (user sees message on next login or at specific event and can reply to messages),
 - customer relationship management (Intercom calculates relationship metric over time and allows app owner find people who need attention).

The market

- * **Now: SaaS providers** (\$21 billion market, \$93 billion in 2016 – Forrester)
- * Later: mobile and desktop app providers
