Introducing Functional Cannabis

CANNABIS AND SMOKING ARE ON A COLLISION COURSE

Since legal cannabis began, the broadest range of product options and the most expert customer service have centered on smokables. But carcinogens and lung damage should not be the price of entry for the benefits of cannabis. The vast majority of cannabis consumers don't want to "get high"; they want to use cannabis to address specific conditions. As legalization expands, more and more consumers want non-smokable, socially dosed, discreet formats.

1906

EDIBLES ARE THE FUTURE

But edibles have been highly problematic. The edibles category is cluttered with cheaply made, unpredictable, bad-tasting product. Most edibles don't offer specific therapeutic effects and they take far too long to activate. (It's no coincidence that so many people have nightmare stories about edibles.)

Consumers need healthier, more effective options to meet their increasingly specific needs.

1906

SOLVING THE PROBLEM WITH EDIBLES OPENS UP A WHOLE NEW WORLD

Our company is pioneering ways to deliver NON-SMOKABLE controlled doses of cannabis and plant medicines in safe, discreet and user-friendly formats that enable cannabis to become a wellness tool and a performance-enhancing "supplement."

MEET FUNCTIONAL CANNABIS

The existing cannabis market was designed for stoners.

There is a vast untapped segment of people who are interested in health and wellness, but have yet to discover cannabis as a crucial tool in their self-care routine.

1906 straddles the cannabis market and the overall health and wellness market by creating finely tuned formulas that enhance the most important parts of high-functioning adults' lives – sleep, sex, energy, cognitive focus, relaxation, and mood.

FUNCTIONAL CANNABIS IS BECOMING MAINSTREAM

A recent survey tells us that the vast majority of adults (3 out of 4) are interested in using cannabis as medicine. Modern life ask a lot of us, and right now, many people turn to pharmaceuticals and alcohol for help. The majority of people would prefer a plant-based alternative, and cannabis is very promising. Even among people who already use cannabis, most cannabis consumers are actually using cannabis to treat pain, anxiety, or sleep problems, rather than “get high.”

OUR RESEARCH TELLS US WE'RE EXACTLY WHAT CONSUMERS NEED

Last fall, we partnered with the Harris Poll on research about how the dispensary experience must change to meet the needs of current consumers, and reach a growing population of people who are interested in cannabis but wary of dispensaries.

We learned that most people do not want to get high. They want to be well.

We also learned that people want cannabis with specific benefits, and they'd prefer an alternative to smokables. Both of these ideas are what 1906 is built on.

OUR AUDIENCE IS DEVELOPING RIGHT IN FRONT OF US

This emerging audience is a mixture of casual cannabis users and non-users.

Life hackers interested in optimal living.

Women are a growing presence.

Our users are a broad age range, have discretionary income, are health conscious and are open minded, with a preference for natural alternatives.

They are culturally astute and in the know. People who are on the leading edge because they like to have an edge.

1906 increasingly appeals to an upscale, high-functioning soccer mom or creatively focused professional. It's a Lululemon, REI, Whole Foods crowd.

This large and lucrative audience segment will soon substitute 1906 products for alcohol, pharmaceuticals, and energy drinks.
